

LEADING THE WAY

Katie Coyne for *Progressive Dairy*

There is no better word to describe this issue's *Leading the Way* article than HOPE. We all know that people in agriculture are resilient. We know that people in the dairy industry are dedicated and hard working. We are ever optimistic that we will survive and thrive.

These are the faces of our youth – from all across the U.S. – that are full of HOPE, resiliency, dedication and optimism that they will show at a fair this summer. And if they can't, they'll still be working hard for next year!
